EDUCATION

BTech in Information Technology College of Engineering Guindy, Anna University, Chennai.	Aug 2023 - Present CGPA : 8.21
HSC (2023) Saradha Higher Matric Secondary School, Gingee, Villupuram district	96.17 %

EXPERIENCE

AstraZeneca – Enterprise Technology Services (ETS) Intern Chennai, India	May 2026 – Jul 2026
- Engineered enterprise AI solutions for intelligent document retrieval spanning 100+ files and ServiceNow analytics covering 8 core tables. - Developed applications leveraging LLMs, RAG pipelines, PostgreSQL, ServiceNow data, and data visualisation, achieving 85-90% response accuracy. - Collaborated with cross-functional teams to build scalable proof-of-concept systems adopted for daily and monthly reporting workflows.	

PROJECTS

Enterprise AI Assistant for Company Documents <i>(Internship Project)</i>	AstraZeneca ETS
- Architected an enterprise assistant using RAG across 100+ internal documents (20-30 pages each). - Enabled semantic search across 100+ documents spanning PDFs, Excel files, and reports. - Engineered document chunking, embedding generation, vector storage, and contextual retrieval for large multi-page files. - Deployed Large Language Models to generate responses with 85-90% accuracy from enterprise knowledge bases. - Replaced manual document search with instant semantic retrieval, cutting information lookup effort significantly. Tech Stack: Python, FastAPI, Ollama, RAG, Vector Database, PostgreSQL, LLMs, LangChain	
ServiceNow Conversational Analytics Platform <i>(Internship Project)</i>	AstraZeneca ETS
- Delivered an intelligent analytics platform spanning 8 database tables sourced from ServiceNow datasets. - Automated ingestion of daily and monthly ServiceNow reports into PostgreSQL, appending data to streamline comparisons. - Developed an NL2SQL pipeline translating natural-language questions into SQL across the platform's 8 tables. - Leveraged LLMs to generate optimized SQL queries dynamically. - Delivered near-instant responses, averaging 10-30 seconds per query, with automatic chart and graph generation. - Supported analytical queries across ServiceNow tables: Incident, Change, Ctask, IDM Task, CMDB, and SCTask. Tech Stack: Python, FastAPI, LLMs (Ollama), PostgreSQL, SQLAlchemy, Pandas, Matplotlib, Plotly	
SpareChange GitHub	<i>Full Stack Development (PERN + ML Integration)</i>
- Piloted a full-stack micro-savings platform with 10 test users, rounding daily transactions into savings, investments, or donations. - Crafted a responsive ReactJS frontend and Node.js backend APIs supporting 10 test users. - Modelled a PostgreSQL database schema for daily transaction tracking. - Established REST API architecture with user authentication and role-based logic. - Incorporated an ML-based recommendation system achieving 90% allocation accuracy. - Ranked in the Top 10 projects department-wide across the entire IT department.	
Ingred2Recipe GitHub	<i>ML</i>
- Achieved 95% ingredient match accuracy across 250+ ingredients using custom parsing and matching algorithms. - Integrated ML-based recommendation logic for recipe suggestions. - Structured a modular architecture designed to scale beyond 250+ ingredients and future datasets. - Enhanced user decision-making through high-accuracy, intelligent recipe suggestions.	

PORTFOLIO

 Portfolio Website: https://www.monishdev.online/	 Scan to Visit
 Developed an AI-powered cross-platform portfolio app with a premium Glassmorphism UI .	
- Features: Voice-enabled AI Chatbot, live GitHub stats, Resume Analyser, Recruiter Mode, and Contact form. - Tech Stack: React Native (Expo), TypeScript, Node.js, Express, MongoDB, EAS Build.	

SKILLS

Programming Languages	: Python, Java, C++, C
Full Stack Development	: HTML, CSS, JavaScript, ReactJS, Vite, Node.js, PostgreSQL, MongoDB, FastAPI
Tech Skills & Tools Used	: Git, GitHub, VS Code, Docker, ServiceNow, LangChain, Ollama, Pandas, Matplotlib, Plotly
Soft Skills	: Communication, Teamwork, Debugging, Technical Documentation, Requirements Analysis

ACHIEVEMENTS AND CERTIFICATIONS

Coordinator in NSS - Coordinated Village Camp at Puliyambakkam, Kanchipuram District, led community outreach, organised cleanliness drives, and contributed to rural development initiatives.	
Google Cybersecurity Professional Certificate Google Cloud Engineering Certificate - NPTEL course - Python for Data Science(85%) - Completed three courses in the LearnTube platform - C Programming, C++ Programming, Data Structure and Algorithms
